ANMOL KAUR

Full Stack Developer

Ludhiana, Punjab, India | anmolkaur1705@gmail.com | linkedin.com/in/anmol-kaur-99641737b | github.com/anmolkaur-hub

PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack developer with skills in the MERN stack (React.js, Node.js, Express.js, MongoDB). Experienced in building web applications, REST APIs, and working with Python. Interested in learning new technologies and improving my development skills.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++

Frameworks & Libraries: React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code

PROJECTS

Moodify — Mood-Based Music Player

React.js, Node.js, MongoDB, JWT

- Built a full-stack web application that captures live webcam input and uses facial-expression detection to identify user mood and auto-curate a matching playlist.
- Designed a full-featured music player supporting playlists, shuffle, repeat, and queue management for a smooth listening experience.
- Implemented JWT-authenticated REST APIs to manage user sessions and secure playlist and profile data.

Amazon Review Sentiment Analyzer

Python, NLP (VADER)

- Developed a desktop sentiment-analysis application that processed 2,700+ customer reviews across 122 products to surface product-level sentiment trends.
- Built visual insights and filtering tools to help users quickly interpret sentiment distribution across products.
- Integrated AI-generated review summaries to speed up qualitative analysis for end users.

AI Chat App

MERN Stack

- Built a real-time, AI-powered chat application with user authentication and session management.
- Integrated backend APIs to handle AI responses and drive dynamic, real-time UI updates for a responsive chat experience.

EDUCATION

Bachelor of Technology — Computer Science *2023 – 2027*

Guru Nanak Dev Engineering College, Ludhiana

CERTIFICATIONS

- Full-Stack Web Development — Udemy
- Python and Machine Learning — Astirmind Software Solutions
